Add a Multi-Question Page to your form

Traditionally, our forms have been designed to show one question at a time. This makes them feel more conversational and increases engagement. But sometimes, you might want to streamline your form by asking multiple questions on the same page. By adding a Multi-Question Page to your form, you can do just that.

When you add a Multi-Question page to your form, here's how questions will be displayed to your respondents.

Could we get your details?*

We won't share them with anyone—promise!

What's your first name? *

Type your answer here...

How to add a Multi-Question Page to your form

1. Go to the form you want to edit and click **+ Add content**.

The screenshot shows the Formstack interface. At the top, there are buttons for 'Create', 'Connect', 'Share', and 'Results'. To the right of these are 'Publish', 'CM', and a gear icon. Below this is a navigation bar with 'Content', 'Design', and 'Logic' tabs, and a dropdown menu showing 'Welcome Screen'. On the left, there's a sidebar with 'Endings' and a '+'. The main area displays a 'Thanks for your interest!' message with a 'Start' button and a note that it 'Takes X minutes'. A yellow arrow points to the '+ Add content' button at the top left of the main content area.

2. Select **Multi-Question Page** from the question menu.

The screenshot shows the 'Add content' modal. It has tabs for 'Add content', 'Import questions', 'Create with AI', and 'Qualify leads'. The 'Add content' tab is selected. The main area is divided into categories: 'Contact info', 'Choice', 'Rating & ranking', 'Text', 'Other', and 'More'. In the 'More' category, the 'Multi-Question Page' option is highlighted with a yellow circle. Other options include 'Welcome Screen', 'Partial Submit Point', 'Statement', 'Question Group', 'End Screen', and 'Redirect to URL'.

Note! If you don't see Multi-Question Page in the content menu, please follow the instructions in this article on how to add multiple questions to a form page.

3. A new page will be added to your form where you can add as many questions as you like. To begin with, write your question header and a description.

The screenshot shows the Formstack interface with a new 'Multi-Question Page' section added. The sidebar now includes a '1 Could we get your details?' item. The main content area shows a new section titled 'Could we get your details? We won't share them with anyone—promise!'. Below this is a text input field with placeholder text 'Type your answer here...'. The right side of the screen shows the 'Content', 'Design', and 'Logic' tabs, and a dropdown menu showing 'Multi-Question Page'.

The screenshot shows the SurveyMonkey interface. On the left, there's a sidebar with a 'Help center' link and a 'Zen Sun Yoga' project. The main area displays a question card with the text 'Could we get your details?'. A yellow arrow points to the dropdown menu icon next to the question text. The right side shows the 'Content' tab of the question settings, which includes options for 'Text' and 'Video', and a 'Multi-Question P...' section.

If you want to change the question type from Short Text to another question type, go to the question settings in the right-hand sidebar and choose a question type from the dropdown menu.

This screenshot shows the 'Content' tab of the question settings. On the left is a search bar with a magnifying glass icon. Below it is a list of question types: 'Phone Number' (phone icon), 'Short Text' (text icon, currently selected), 'Email' (envelope icon), 'Yes/No' (checkbox icon), 'Legal' (document icon), and 'Multiple Choice' (list icon).

5. Write your first question.

The screenshot shows the SurveyMonkey interface with a question card containing the text 'Could we get your details?'. The 'Content' tab of the question settings is open, showing that 'Short Text' is selected. The 'Settings' section includes 'Required' and 'Max characters' fields. The right side of the screen shows the 'Design' and 'Logic' tabs.

6. Then click + Add content to add another question.

8. Once you've added all the questions you want, you're done!

If you want to add more questions to your form outside of the Multi-Question page, click **+ Add content** and select a question type.

If you select a question type that's compatible with the Multi-Question Page (see the top of this article for a full list of supported question types), it'll be placed in the Multi-Question Page by default, but you can move it by clicking and dragging it out of the Multi-Question Page.

You can also click on the question type icons and drag them around to change the order within the Multi-Question Page.

Similarly, you can drag and drop compatible question types into your Multi-Question Page.

11. Similarly, when you connect a form containing a Multi-Question Page to another tool, it works just like with any other question type. You can map each question from the Multi-Question Page to a different field in the integration.

Map typeform questions to Mailchimp fields

What's your first name? → First Name

Clear all

We'll update your existing contact records

If you just want to update existing contacts in your Mailchimp without using the email question, you have to add a Hidden Field to your typeform. When sharing your typeform link within your email campaign, replace the Hidden Field value with Mailchimp's *EMAIL* merge tag. [Learn how to automate Hidden Fields](#)

FAQ

Can I add a Partial Submit Point after the Multi-Question Page?

You can add a Partial Submit Point after the Multi-Question Page, just like with any other question type. However, you can't add a Partial Submit Point after a specific question within your Multi-Question Page.

Does the Multi-Question Page support Data Enrichment?

Yes. You can collect enrichment data with an email question in the Multi-Question Page if it is the first email question of your form.

Can I use Logic with the Multi-Question Page?

Yes. You can use Logic to direct respondents to a Multi-Question page or use answers provided in the Multi-Question Page in Logic rules.

Can I add a score or create an outcome quiz with the Multi-Question Page?

No. Currently, adding a score or creating an outcome quiz is not supported with the Multi-Question Page.

If you want to create an umbrella question with sub-questions on separate pages, check out our Question Group feature.

Can I embed a Multi-Question Page in an email?
